## SESSION SUMMARY

SITE: VIKING I LANDER (on Mars)

First impressions..... something dark, blue-black, soft, gooey, surrounded by yellow, brown, sandy, gritty..... lots of curving. Then an angle popped in, indicating the presence of a structure... Stage II's at this point were dark, blue-black, tall, long, angles, hard, smooth and rough... cool/cold.... A.I. of being cold, chilled. Very strong AOL of a tall, long wall..... still perceiving angles.... A.I. break.... Strange complex structure.... colors constantly changing. From 75 feet above.... angles, curves... changing colors of blue, green, yellow. Waves of fluorescent green flowing into site... then reversing and emanating out from site. Inside the structure.... curves, angles, angles that curve.... red, yellow, green, predominately red/crimson.... Structure surrounded by land which is yellow, brown, sandy, gritty.....

Post session impressions.... strange structure.... unable to describe it.... "Like something one would expect to find on the planet Mars."

Perhaps there may have been so much confusion because of the many arms, legs, pads, dishes, antennae, etc. associated with this vehicle. I'm still not sure why the colors appeared to be changing while perceiving this site.

I think it's a good idea to write down post-session impressions, they sometimes linger for a time. OK - : ) 260

b. structure

AOL Break -  
like a dam

Site is a structure — that is long, tall, vertical, consisting of curving angles. It is smooth and rough at the same time, cold, very cold. Inside the structure are many angles and curves, and curving angles, predominant color inside is red/crimson.

Structure is dark-blue and is surrounded by land which is yellow, brown, sandy, gritty.

This site makes me feel confused and strange, also  
very cold

## POST SESSION IMPRESSIONS

*Although the signal line indicates that there is a structure at this location, it is like no structure I can relate to, almost as if it is of another dimension, It's like something one would expect to find on the planet Mars. The strange thing about this site/structure is that it seemed to change color. The structure itself was never "visible".*
